16. ABSTRACT

The twice per year cumulative index to both subject and author covers more than 4800 abstracts in five of the monthly issues. The monthly issues of "Air Pollution Abstracts" were published to inform air pollution control personnel of the U. S. Environmental Protection Agency, and others, of technical literature recently accessioned by the Air Pollution Technical Information Center (APTIC).

CONTENTS

Subject Index SU-1

The terms that most closely describe the information presented in the documents are arranged alphabetically. The title of the document is indented below the subject term. The APTIC accession number and the subject field where the abstract can be located follow on the next line.

Author Index PA-1

Personal authors (maximum of five per document) are arranged alphabetically. The names are presented last name first. No distinction is displayed between senior and other authors. The title of the document is indented below the author's name. The APTIC accession number and the subject field where the abstract can be located follow on the next line.
